

BRINGING SIMPLICITY TO YOUR COMPLEX LNG TRANSACTIONS

COMET IS LNG TRADING PLATFORM OF CHOICE

The Singapore based LNG consulting firm, ALNGE Pte Ltd, posted a recent poll on LinkedIn and asked the LNG community at large to name the LNG trading platform that will become the most established and popular within the next 2 years.

The LNG industry selected COMET at a 5:1 ratio over the 2nd place platform and 3 x over the total of the entire group of platforms.

While not a scientific poll, this outcome has added to the on-going industry dialogue around the future of LNG trading.

COMET has teamed up with the LNG community to build the most robust technology to improve the transaction value chain, provide internal transparency for better business decisions and automation that ultimately results in lower commodity costs.

Perhaps most importantly, in today's post COVID-19 trading environment, COMET is remotely accessible by all users while keeping all data safe, confidential and secure.

Possibly this is why COMET fared so well in this industry poll.
